

The figure displays a grid of 360 numbered cells, arranged in a roughly rectangular pattern. The grid is overlaid with several colored regions representing different types of land or structures:

- CULVERT (excluded):** A large blue hatched area on the left side of the grid, covering cells approximately 100 to 200.
- ROOM + 1 m (excluded):** A purple hatched area on the right side of the grid, covering cells approximately 200 to 300.
- HANGAR + 1 m (excluded):** A green hatched area at the bottom of the grid, covering cells approximately 300 to 360.

The grid cells are numbered 1 to 360, with some cells containing elevation data. The grid is bounded by a red line. The map shows a complex layout of land parcels with various exclusions and a detailed grid system.
